Transaction Folder contains file Account.java

Code:

```
package transaction;
public class Account {
   private int accountNumber;
   private double balance;
   public Account(int accountNumber, double balance) {
      this.accountNumber = accountNumber;
      this.balance = balance;
   }
   public void deposit(double amount) {
      if (amount > 0) {
         balance += amount;
         System.out.println("Deposited: " + amount);
      } else {
         System.out.println("Invalid deposit amount");
      }
   }
   public void withdraw(double amount) {
      if (amount > 0 && amount <= balance) {
         balance -= amount;
         System.out.println("Withdrawn: " + amount);
      } else {
         System.out.println("Insufficient balance or
invalid amount");
      }
   }
   public int getAccountNumber() {
      return accountNumber;
   }
   public double getBalance() {
```

```
        return balance;
    }
}
```

Reports Folder contains file TransactionReport.java

Code:

```
package reports;
import transaction.Account;
public class TransactionReport {
    public void generateReport(Account account) {
        System.out.println("\n----- Transaction Report ----
");
        System.out.println("Account Number: " +
account.getAccountNumber());
        System.out.println("Current Balance: " +
account.getBalance());
        System.out.println("-----------------------------");
    }
}
```

Main.java

Code:

```
import transaction.Account;
import reports.TransactionReport;
public class Main {
    public static void main(String[] args) {
        Account acc = new Account(101, 5000);
        acc.deposit(2000);
        acc.withdraw(1500);
        TransactionReport report = new TransactionReport();
        report.generateReport(acc);
        System.out.println("Coded by: Kasham Adhikari");
        System.out.println("USN: 1BF25CS122");
```

```
        System.out.println("Section: C");
    }
}
```

Output:
